

## SKYLINE PARTNERS - PROJECTS

### GENENTECH B82 PHASE 1 RESTACK, SOUTH SAN FRANCISCO, CA

The Genentech B82 Project consisted of 16 floors with complete demo and new construction. Controlling the 408 + end users, shuffling / moving departments to free up space, scheduling all of the multiple vendors, and enforcing Genentech's rigid standards kept Skyline Partners, Inc. on their toes during the duration of this project.

Keith DeBrine was responsible for the project management of the project. The specific areas and vendors managed included: project budget, schedule, user expectations, move management, space planning / allocation, architect / design, general contractor, audio visual, furniture, data cabling, telephones and equipment.

The developer on this project was Boston Properties.
